

## ***Future Predictions Game***

**Objective:** Students will practice the three future tenses by making predictions about the future and discussing them with the class.

### **Step 1:**

- Each student will think of **5 predictions** about the future (for example, predictions about technology, society, or even their personal lives).
- They must use **will**, **be going to**, and **present continuous for future** in their predictions.

### **Example Predictions:**

1. "In 100 years, people **will** live on Mars."
2. "I **am going to** learn to drive next year."
3. "In 50 years, robots **will** do all our work."
4. "My family **is going to** visit the beach this summer."
5. "I **am meeting** my friend for coffee tomorrow."

### **Step 2: Writing**

- Give students a few minutes to write down their 5 future predictions. Encourage them to use different future tenses as much as possible.
- *Reminder* - students can write predictions about personal plans, global changes, or imagined situations.

### **Step 3: Share**

- Each student shares their 5 predictions with the group.
- Follow-up questions from other students encouraged, e.g.:
  - "Why do you think people will live on Mars?"
  - "When are you going to learn to drive?"
  - "Where are you meeting your friend tomorrow?"
